Rhesus CD10/Neprilysin (His Tag) recombinant protein

Specificity

Rhesus CD10 / Neprilysin / MME

Antibody description

Rabbit Polyclonal to Rhesus MME

Preparation

Produced in rabbits immunized with purified, recombinant Rhesus CD10 / Neprilysin / MME . CD10 / Neprilysin / MME specific IgG was purified by Rhesus CD10 / Neprilysin / MME affinity chromatography.

Formulation

0.2 µm filtered solution in PBS

Storage

This antibody can be stored at 2℃-8℃ for one month without detectable loss of activity. Antibody products are stable for twelve months from date of receipt when stored at -20℃ to -80℃. Preservative-Free.
Sodium azide is recommended to avoid contamination (final concentration 0.05%-0.1%). It is toxic to cells and should be disposed of properly. Avoid repeated freeze-thaw cycles.
