## Anti-IL-6R/CD126 antibody

Catalog Number: 101997

#### Product name

Anti-IL-6R/CD126 antibody

## **Immunogen**

<u>Human IL-6R/CD126 (His Tag) recombinant</u> protein

## **Specificity**

Human IL-6R / CD126

## **Antibody description**

Mouse monoclonal to IL-6R/CD126

## Preparation

This antibody was produced from a hybridoma resulting from the fusion of a mouse myeloma with B cells obtained from a mouse immunized with purified, recombinant Human IL-6R / CD126 (rh IL-6R / CD126; NP\_000556.1; Met1-Pro365). The IgG fraction of the cell culture supernatant was purified by Protein A affinity chromatography.

#### **Formulation**

0.2 µm filtered solution in PBS with 5% trehalose

#### Storage

This antibody can be stored at 2°C-8°C for one month without detectable loss of activity. Antibody products are stable for twelve months from date of receipt when stored at -20°C to -80°C. Preservative-Free.

Sodium azide is recommended to avoid contamination (final concentration 0.05%-0.1%). It is toxic to cells and should be disposed of properly. Avoid repeated freeze-thaw cycles.

## **Clonality**

Monoclonal

# Ig Type

Mouse IgG1

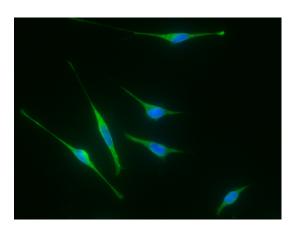

## **Applications**

IF, ICC/IF

#### **Dilutions**

ICC/IF: 10-25 μg/mL

## **Validations**

IL-6R / CD126 Antibody, Mouse MAb, Immunofluorescence

Immunofluorescence staining of Human IL6R in Hela cells. Cells were fixed with 4% PFA, permeabilzed with 1% Triton X-100 in PBS, blocked with 10% serum, and incubated with Mouse anti-Human IL6R monoclonal antibody (15 µg/ml) at 37°C 1 hour. Then cells were stained with the Alexa Fluor® 488-conjugated Goat Antimouse IgG secondary antibody (green) and counterstained with DAPI (blue). Positive staining was localized to plasma membrane.
