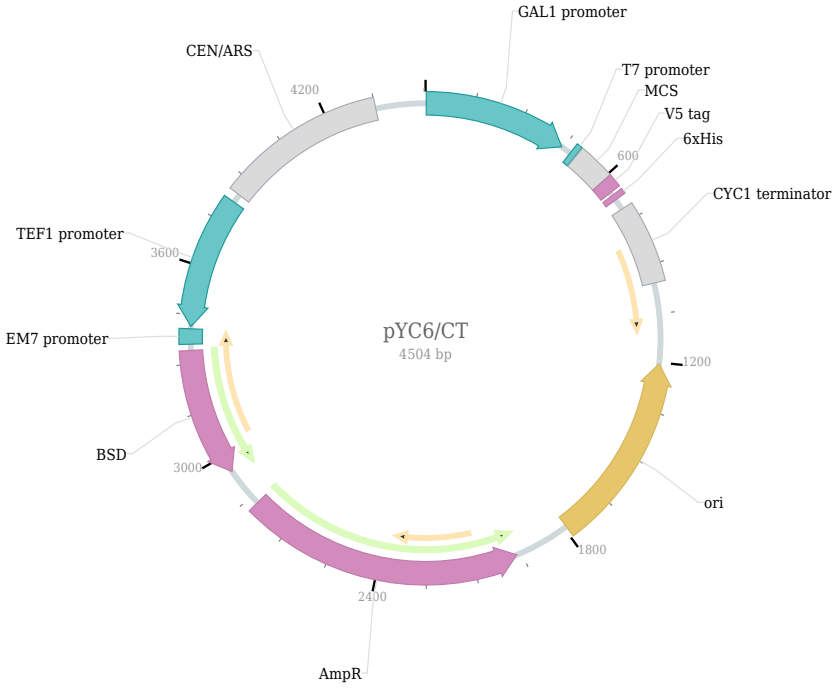
pYC6/CT

Vector ID	V010208
Antibiotic Resistance	Ampicillin
Length	4504 bp
Vector Type	Yeast Plasmids

Product Information

Replication Origin	ori
Source/Author	Invitrogen (Life Technologies)
Copy Number	High copy number
Promoter	GAL1
Growth Strain(s)	Stbl3
Growth Temperature	37℃
Comment	The pYC6/CT is a centromeric vector designed for S. cerevisiae, featuring a blasticidin resistance marker. It facilitates galactose-inducible expression of C-terminally tagged proteins.

Vector Map



Plasmid Resuspension Protocol

1. Centrifuge at 5,000×g for 5 min.
2. Carefully open the tube and add sterile water to dissolve the DNA: add 20 µl for 5 µg plasmid, and 100 µl for 100 µg plasmid.
3. Close the tube and incubate for 10 minutes at room temperature.
4. Briefly vortex the tube and then do a quick spin to concentrate the liquid at the bottom. Speed is less than 5000×g.
5. Store the plasmid at -20 ℃.
