

# Anti-IL-6R/CD126 antibody

Catalog Number: 100099

## Product name

Anti-IL-6R/CD126 antibody

## Immunogen

[Human IL-6R/CD126 \(His Tag\) recombinant protein](#)

## Specificity

Human IL-6R / CD126

**No cross-reactivity** with rat IL6R (501482), mouse IL6R (500652) and canine IL6R (502343) in ELISA assay

## Antibody description

Mouse monoclonal to IL-6R/CD126

## Preparation

This antibody was produced from a hybridoma resulting from the fusion of a mouse myeloma with B cells obtained from a mouse immunized with purified, recombinant Human IL-6R / CD126 (rh IL-6R / CD126; NP\_000556.1; Met1-Pro365). The IgG fraction of the cell culture supernatant was purified by Protein A affinity chromatography.

## Formulation

0.2  $\mu$ m filtered solution in PBS (pH7.4) + 5% Trehalose Dihydrate

## Storage

This antibody can be stored at 2°C-8°C for one month without detectable loss of activity. Antibody products are stable for twelve months from date of receipt when stored at -20°C to -80°C.

Preservative-Free. Sodium azide is recommended to avoid contamination (final concentration 0.05%-0.1%). It is toxic to cells and should be disposed of properly. Avoid repeated freeze-thaw cycles.

## Clonality

Monoclonal

## Ig Type

Mouse IgG1

## Applications

B/N

## Dilutions

**Block** - This IL6R Neutralizing Antibody can not block the binding of recombinant IL6 to its recombinant receptor IL6  $\alpha$ .

**Neutralization** - The neutralization activity of IL6R Neutralizing Antibody is measured by its ability to neutralize IL6  $\alpha$ -mediated inhibition of proliferation in the M1 mouse myeloid leukemia cell line. The Neutralization Titer (IC50) is typically 0.15-0.6  $\mu$ g/mL in the presence of 50 ng/mL Recombinant Human IL6  $\alpha$  and 100 ng/mL Recombinant Human IL6.

## Validations

IL-6R / CD126 Neutralizing Antibody

**IL-6  $\alpha$  Enhancement of IL6-dependent Inhibition of Cell Proliferation was Neutralized by Human IL-6  $\alpha$  Neutralizing Antibody in the M1 mouse myeloid leukemia cell line.** Enhancement of Recombinant Human IL6 (100 ng/mL) activity elicited by Recombinant Human IL-6  $\alpha$  (50 ng/mL) is neutralized by increasing concentrations of Human IL6  $\alpha$  neutralizing Monoclonal Antibody (Catalog 10398-

# Anti-IL-6R/CD126 antibody
