

Anti-Vitronectin antibody

Catalog Number: 103363

Product name

Anti-Vitronectin antibody

Immunogen

[Mouse Vitronectin \(His Tag\) recombinant protein](#)

Specificity

Mouse Vitronectin / VTN

Antibody description

Rabbit polyclonal to Vitronectin

Preparation

Produced in rabbits immunized with purified, recombinant Mouse Vitronectin / VTN (rM Vitronectin / VTN; NP_035837.1; Met 1-Lys 478). Vitronectin / VTN specific IgG was purified by Mouse Vitronectin / VTN affinity chromatography.

Formulation

0.2 µm filtered solution in PBS with 5% trehalose

Storage

This antibody can be stored at 2°C-8°C for one month without detectable loss of activity. Antibody products are stable for twelve months from date of receipt when stored at -20°C to -80°C.

Preservative-Free.

Sodium azide is recommended to avoid contamination (final concentration 0.05%-0.1%). It is toxic to cells and should be disposed of properly. Avoid repeated freeze-thaw cycles.

Clonality

Polyclonal

Ig Type

Rabbit IgG

Applications

ELISA, IHC-P

Dilutions

ELISA: 0.1-0.2 µg/mL

This antibody can be used at 0.1-0.2 µg/mL with the appropriate secondary reagents to detect Mouse VTN. The detection limit for Mouse VTN is approximately 0.00245 ng/well.

IHC-P: 0.5-2 µg/mL

Validations

Vitronectin / VTN Antibody, Rabbit PAb, Antigen Affinity Purified, Immunohistochemistry

Immunochemical staining of mouse VTN in mouse liver with rabbit polyclonal antibody (1 µg/mL, formalin-fixed paraffin embedded sections). The left panel: tissue incubated with primary antibody; The right panel: tissue incubated with the mixture of primary antibody and antigen (recombinant
