

# H3N2 HA (His Tag) recombinant protein

Catalog Number: 500313

## General Information

### Protein Construction

A DNA sequence encoding the extracellular domain of Influenza A virus (A/Brisbane/10/2007 (H3N2)) (ABW23353.1) hemagglutinin (Met 1-Ile 531) (Native, HA1+HA2, uncleaved) was expressed with a C-terminal polyhistidine.

### Organism

H3N2

### Expression Host

Human Cells

## QC Testing

### Purity

> 97 % as determined by SDS-PAGE

### Endotoxin

< 1.0 EU per  $\mu\text{g}$  of the protein as determined by the LAL method

### Stability

Samples are stable for up to twelve months from date of receipt at  $-70^{\circ}\text{C}$

### Predicted N terminal

Gln 17

### Molecular Mass

The secreted recombinant hemagglutinin of Influenza A virus (A/Brisbane/10/2007 (H3N2)) comprises 526 amino acids with the predicted

molecular mass of 59 kDa. As a result of glycosylation, it migrates as an approximately 90-100 kDa band in SDS-PAGE under reducing conditions.

### Formulation

Lyophilized from sterile PBS, pH 7.4

1. 5 % trehalose and mannitol are added as protectants before lyophilization.
2. Please contact us for any concerns or special requirements.

## Usage Guide

### Storage

Store it under sterile conditions at  $-20^{\circ}\text{C}$  to  $-80^{\circ}\text{C}$ . It is recommended that the protein be aliquoted for optimal storage. Avoid repeated freeze-thaw cycles.

### Reconstitution

Adding sterile water, prepare a stock solution of 0.25 mg/ml. Concentration is measured by UV-Vis.

### SDS-PAGE

Influenza A H3N2 (A/Brisbane/10/2007) Hemagglutinin / HA Protein (His Tag) SDS-PAGE
