

# Human vasoactive intestinal peptide / VIP (His Tag) recombinant protein

Catalog Number: 500870

## General Information

### Gene Name Synonym

Intestinal peptide PHV-42; Peptide histidine valine 42; Intestinal peptide PHM-27; Peptide histidine methioninamide 27; Vasoactive intestinal peptide; Vasoactive intestinal polypeptide

### Protein Construction

A DNA sequence encoding the human VIP (P01282-2) (Met1-Lys169) with a C-terminal polyhistidine tag was expressed.

### Organism

Human

### Expression Host

Human Cells

## QC Testing

### Purity

(38.2+8+44.3) % as determined by SDS-PAGE

### Endotoxin

< 1.0 EU per µg of the protein as determined by the LAL method

### Stability

Samples are stable for up to twelve months from date of receipt at -70°C

### Predicted N terminal

Ser 21

### Molecular Mass

The recombinant human VIP comprises 160 amino acids and has a predicted molecular mass of 18.3 kDa. The apparent molecular mass of the protein is approximately 25, 21 and 15 kDa in SDS-PAGE under reducing conditions

### Formulation

Lyophilized from sterile PBS, pH 7.4.

1. 5 % trehalose and mannitol are added as protectants before lyophilization.
2. Please contact us for any concerns or special requirements.

## Usage Guide

### Storage

Store it under sterile conditions at -20°C to -80°C. It is recommended that the protein be aliquoted for optimal storage. Avoid repeated freeze-thaw cycles.

### Reconstitution

Adding sterile water, prepare a stock solution of 0.25 mg/ml. Concentration is measured by UV-Vis.

### SDS-PAGE

Human Vasoactive intestinal peptide / VIP Protein (His Tag) SDS-PAGE
