

Rat Endothelial Cell Adhesion Molecule (Fc Tag) recombinant protein

Catalog Number: 501129

General Information

Protein Construction

A DNA sequence encoding the rat ESAM (Q6AYD4) extracellular domain (Met 1-Ala 251) was fused with the Fc region of human IgG1 at the C-terminus.

Organism

Rat

Expression Host

Human Cells

QC Testing

Purity

> 85 % as determined by SDS-PAGE

Endotoxin

< 1.0 EU per μg of the protein as determined by the LAL method

Stability

Samples are stable for up to twelve months from date of receipt at -70°C

Predicted N terminal

Gln 30

Molecular Mass

The recombinant rat ESAM/Fc is a disulfide-linked homodimer. The reduced monomer comprises 463 amino acids and predicts a molecular mass of 51.2

kDa. The apparent molecular mass of the rat ESAM/Fc monomer is approximately 55-60 kDa in SDS-PAGE under reducing conditions.

Formulation

Lyophilized from sterile PBS, pH 7.4

1. 5 % trehalose and mannitol are added as protectants before lyophilization.

2. Please contact us for any concerns or special requirements.

Usage Guide

Storage

Store it under sterile conditions at -20°C to -80°C . It is recommended that the protein be aliquoted for optimal storage. Avoid repeated freeze-thaw cycles.

Reconstitution

Adding sterile water, prepare a stock solution of 0.25 mg/ml. Concentration is measured by UV-Vis.
