

Human IGFBP6 / IBP6 (His Tag) recombinant protein

Catalog Number: 501174

General Information

Protein Construction

A DNA sequence encoding the human IGFBP6 (P24592) (Met 1-Gly 240) was fused with a polyhistidine tag at the C-terminus.

Organism

Human

Expression Host

Human Cells

QC Testing

Activity

1. Measured by its ability to bind human IGF1 (Cat:10598-H24E) in functional ELISA.
2. Measured by its ability to bind human IGF2 (Cat:13032-H24E) in functional ELISA.
3. Measured by its ability to inhibit the biological activity of IGF1 or IGFII on MCF7 human breast adenocarcinoma cells (Karey, K.P. et al. (1988) Cancer Research 48:4083.). The ED₅₀ for this effect is typically 1-5 µg/mL in the presence of 14 ng/mL human IGFII.

Purity

> 96 % as determined by SDS-PAGE

Endotoxin

< 1.0 EU per µg of the protein as determined by the LAL method

Stability

Samples are stable for up to twelve months from date of receipt at -70°C

Predicted N terminal

Arg 28

Molecular Mass

The recombinant human IGFBP6 consists of 224 amino acids and has a predicted molecular mass of 23.9 kDa. In SDS-PAGE under reducing conditions, the apparent molecular mass of rhIGFBP6 is approximately 36 kDa due to glycosylation.

Formulation

Lyophilized from sterile PBS, pH 7.4

1. 5 % trehalose and mannitol are added as protectants before lyophilization.

2. Please contact us for any concerns or special requirements.

Usage Guide

Storage

Store it under sterile conditions at -20°C to -80°C. It is recommended that the protein be aliquoted for optimal storage. Avoid repeated freeze-thaw cycles.

Reconstitution

Adding sterile water, prepare a stock solution of 0.25 mg/ml. Concentration is measured by UV-Vis.

SDS-PAGE

Human IGFBP6 / IBP-6 Protein (His Tag) SDS-PAGE
