

Human KSP-Cadherin/Cadherin-16 (His Tag) recombinant protein

Catalog Number: 502065

General Information

Gene Name Synonym

Kidney-specific cadherin

Protein Construction

A DNA sequence encoding the extracellular domain of human CDH16 (NP_004053.1) (Met 1-Ala 786) was expressed, fused with a polyhistidine tag at the C-terminus.

Organism

Human

Expression Host

Human Cells

QC Testing

Activity

Measured by the ability of the immobilized protein to support the adhesion of MCF-7 human breast adenocarcinoma cells.

When cells are added to CDH16-His coated plates (10 µg/mL, 100 µL/well), approximately 20-40% will adhere specifically after 60 minutes at 37 °C.

Purity

> 70 % as determined by SDS-PAGE

Endotoxin

< 1.0 EU per µg of the protein as determined by the LAL method

Stability

Samples are stable for up to twelve months from date of receipt at -70°C

Predicted N terminal

Lys 19

Molecular Mass

The recombinant human CDH16 comprises 779 amino acids and has a calculated molecular mass of 84.8 kDa. As a result of glycosylation, the recombinant protein migrates as an approximately 100 kDa protein in SDS-PAGE under reducing conditions.

Formulation

Lyophilized from sterile PBS, pH 7.4

1. 5 % trehalose and mannitol are added as protectants before lyophilization.

2. Please contact us for any concerns or special requirements.

Usage Guide

Storage

Store it under sterile conditions at -20°C to -80°C. It is recommended that the protein be aliquoted for optimal storage. Avoid repeated freeze-thaw cycles.

Reconstitution

Adding sterile water, prepare a stock solution of 0.25 mg/ml. Concentration is measured by UV-Vis.
