Catalog Number: 504108

# NovoPro

## **General Information**

#### **Protein Construction**

A DNA sequence encoding the human Noggin precursor (NP\_005441.1) (Met 1-Cys 232) was fused with a polyhistidine tag at the C-terminus.

#### Organism

Human

#### **Expression Host**

Human Cells

### **QC Testing**

#### Activity

Measured by its ability to inhibit recombinant human BMP4 induced alkaline phosphatase production by MC3T3-E1 cells. The ED<sub>50</sub> for this effect is typically 0.05-0.3  $\mu$ g/mL in the presence of 50 ng/mL of recombinant human BMP4.

#### Purity

> 95 % as determined by SDS-PAGE

#### Endotoxin

< 1.0 EU per  $\mu g$  of the protein as determined by the LAL method

#### Stability

Samples are stable for up to twelve months from date of receipt at -70  $^{\circ}\mathrm{C}$ 

#### **Predicted N terminal**

Gln 28

#### **Molecular Mass**

The recombinant human Noggin comprises 216 amino acids after removal of the signal peptide and has a predicted molecular mass of 24.6 kDa. As a result of glycosylation, rhNoggin migrates as an approximately 30 kDa bnd in SDS-PAGE under reducing conditions.

#### Formulation

Lyophilized from sterile PBS, pH 7.41. 5 % trehalose and mannitol are added as protectants before lyophilization.2. Please contact us for any concerns or special requirements.

## **Usage Guide**

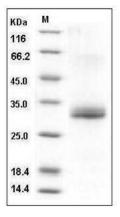

#### Storage

Store it under sterile conditions at -20°C to -80°C. It is recommended that the protein be aliquoted for optimal storage. Avoid repeated freeze-thaw cycles.

#### Reconstitution

Adding sterile water, prepare a stock solution of 0.25 mg/ml. Concentration is measured by UV-Vis.

#### **SDS-PAGE**

Human Noggin / NOG Protein (His Tag) SDS-PAGE
