

General Information

Protein Construction

The mature form of the extracellular domain (Met 1-Asn 343) of human CD155 (NP_006496.3) was expressed and purified, with additional five amino acids (DDDDK) at the C-terminus.

Organism

Human

Expression Host

Human Cells

QC Testing

Activity

Measure by its ability to bind with recombinant human DNAM1 / CD226.

Purity

> 95 % as determined by SDS-PAGE

Endotoxin

< 1.0 EU per μg of the protein as determined by the LAL method

Stability

Samples are stable for up to twelve months from date of receipt at -70°C

Predicted N terminal

Leu 18

Molecular Mass

The recombinant human CD155 is a monomeric

protein after proteolytic removal of the signal peptide. It consists of 329 amino acids and predicts a molecular mass of 35.7 kDa. As a result of glycosylation, the apparent molecular mass of rhCD155 is approximately 55-60 kDa in SDS-PAGE under reducing conditions.

Formulation

Lyophilized from sterile 50mM Tris, 100mM NaCl, pH 8.0

1. 5 % trehalose and mannitol are added as protectants before lyophilization.

2. Please contact us for any concerns or special requirements.

Usage Guide

Storage

Store it under sterile conditions at -20°C to -80°C . It is recommended that the protein be aliquoted for optimal storage. Avoid repeated freeze-thaw cycles.

Reconstitution

Adding sterile water, prepare a stock solution of 0.25 mg/ml. Concentration is measured by UV-Vis.

SDS-PAGE

Human CD155 / PVR / NECL5 Protein SDS-PAGE
