

Human ACC Recombinant protein (GST tag)

Catalog Number: 505067

General Information

Gene Name Synonym:

ACC1; EC 6.4.1.2; ACC-alpha [Includes: Biotin carboxylase; EC 6.3.4.14]

Protein Construction:

A DNA sequence encoding the human ACACA (XP_054171870.1) 2268-2391 aa was fused with the N-terminal GST tag

Source: Human

Expression Host: E. coli

QC Testing

Activity:

Not tested.

Purity:

Endotoxin:

Please contact the lab for more information.

Stability:

Store for up to 12 months at -20°C to -80°C as lyophilized powder.

Predicted N terminal:

Molecular Mass:

Formulation:

Protein lyophilized in sterile PBS (58 mM Na₂HPO₄, 17 mM NaH₂PO₄, 68 mM NaCl, 100

mM GSH, pH 8.0). Trehalose (5-8%) and mannitol (5-8%) protectants were added before lyophilization.

Usage Guide

Storage:

Store it under sterile conditions at -20°C to -80°C. It is recommended that the protein be aliquoted for optimal storage. Avoid repeated freeze-thaw cycles.

Reconstitution:

Reconstitute at 0.25 µg/µl in sterile water for short-term storage. Reconstitution with 50% glycerol solution is recommended for longer term storage (see Stability and Storage for more details). If a different concentration is needed for your purposes please adjust the reconstitution volume as required (please note: the ion concentration of the final solution will vary according to the volume used). Note: Centrifuge vial before opening. When reconstituting, gently pipet and wash down the sides of the vial to ensure full recovery of the protein into solution.

SDS-PAGE:

Recombinant human ACC SDS-PAGE
