

Certificate of Analysis

Human SV2C Recombinant protein (His tag)

Catalog Number: 513353

Product Information

Batch No.	NP456494
Species	Human
Source	E. coli
Tag	N-His tag
Accession	Q496J9
Molecular Weight	Predictes a molecular mass of 11.10 kDa. In SDS-PAGE under reducing conditions, it migrates as an approximately 11.14 kDa band.
Gene ID	22987

Analytical Data

Test	Specifications	Results
Purity	>90%, by SDS-PAGE with Coomassie Brilliant Blue staining.	90%
Endotoxin Level	-	Not Tested
Molecular Weight		Approximately 11.10 kDa band in reducing SDS-PAGE.
Appearance		White lyophilized powder

Preparation and Storage

Formulation	Protein lyophilized in sterile PBS (58 mM Na ₂ HPO ₄ , 17 mM NaH ₂ PO ₄ , 68 mM NaCl, 300 mM Imidazole, pH 8.0). Trehalose (5-8%) and mannitol (5-8%) protectants were added before lyophilization.
Reconstitution	Reconstitute at 0.25 µg/ul in sterile water for short-term storage. Reconstitution with 50% glycerol solution is recommended for longer term storage (see Stability and Storage for more details). If a different concentration is needed for your purposes please adjust the reconstitution volume as required (please note: the ion concentration of the final solution will vary according to the volume used). Note: Centrifuge vial before opening. When reconstituting, gently pipet and wash down the sides of the vial to ensure full recovery of the protein into solution.
Storage & Stability	Store for up to 12 months at -20°C to -80°C as lyophilized powder. Store it under sterile conditions at -20°C to -80°C. It is recommended that the protein be aliquoted for optimal storage. Avoid repeated freeze-thaw cycles.
Shipping	Ambient temperature

This certificate summarizes the QC information recorded for the batch listed above.
