pET-14b

Vector ID	V011030
Antibiotic Resistance	Ampicillin
Length	4668 bp
Vector Type	pET & Duet Vectors (Novagen)

Product Information

Replication Origin	ori
Source/Author	Novagen (EMD Millipore)
Copy Number	High copy number
Promoter	tet
Growth Strain(s)	DH10B
Growth Temperature	37℃
Comment	The pET-14b is an E. coli expression vector featuring a T7 promoter and an N-terminal His-Tag for high-level protein production and purification via immobilized metal affinity chromatography (IMAC).

Vector Map

Plasmid Resuspension Protocol

1. Centrifuge at 5,000×g for 5 min.
2. Carefully open the tube and add sterile water to dissolve the DNA: add 20 µl for 5 µg plasmid, and 100 µl for 100 µg plasmid.
3. Close the tube and incubate for 10 minutes at room temperature.
4. Briefly vortex the tube and then do a quick spin to concentrate the liquid at the bottom. Speed is less than 5000×g.
5. Store the plasmid at -20 ℃.
