pHH21-SC09NS-Luc

Vector ID	V018046
Antibiotic Resistance	Ampicillin
Length	4524 bp
Vector Type	Luciferase reporter
Host	Mammalian cells

Product Information

Replication Origin	ori
Promoter	RNA polymease I
5' Primer	pHH21-F3
Growth Strain(s)	DH10B
Growth Temperature	37℃
Comment	The pHH21-SC09NS-Luc is a reverse genetics plasmid for influenza A virus, carrying a luciferase reporter gene in the NS segment. It enables real-time monitoring of viral replication and is used for antiviral screening and molecular studies.

Vector Map

Plasmid Resuspension Protocol

1. Centrifuge at 5,000×g for 5 min.
2. Carefully open the tube and add sterile water to dissolve the DNA: add 20 µl for 5 µg plasmid, and 100 µl for 100 µg plasmid.
3. Close the tube and incubate for 10 minutes at room temperature.
4. Briefly vortex the tube and then do a quick spin to concentrate the liquid at the bottom. Speed is less than 5000×g.
5. Store the plasmid at -20 ℃.
