# Recombinant CC90B protein (His tag)

| | |
|---|---|
| **Catalog Number** | 548838 |
| **Species** | Human |
| **Expression System** | E. coli |
| **Accession** | Q9GZT6 |
| **Molecular Weight** | Predictes a molecular mass of 21.39 kDa. In SDS-PAGE under reducing conditions, it migrates as an approximately 24 kDa band. |

## Product Information

| | |
|---|---|
| **Sequence Region** | 59-230 |
| **Form** | Lyophilized powder |
| **Formulation** | Lyophilized from sterile PBS, pH 7.4 |
| **Purity** | >86%, by SDS-PAGE with Coomassie Brilliant Blue staining. |
| **Endotoxin** | Not tested. |
| **Activity** | Not tested. |
| **Stability** | Samples are stable for up to twelve months from date of receipt at -70℃ |
| **Protein Construction** | DNA encoding 59-230 aa (Q9GZT6) were fused with 6His tag. |

## Storage & Handling

| | |
|---|---|
| **Reconstitution** | Reconstitute at 0.25 μg/μl in sterile water for short-term storage. Reconstitution with 50% glycerol solution is recommended for longer term storage (see Stability and Storage for more details). If a different concentration is needed for your purposes please adjust the reconstitution volume as required (please note: the ion concentration of the final solution will vary according to the volume used). Note: Centrifuge vial before opening. When reconstituting, gently pipet and wash down the sides of the vial to ensure full recovery of the protein into solution. |
| **Storage** | Store it under sterile conditions at -20℃ to -80℃. It is recommended that the protein be aliquoted for optimal storage. Avoid repeated freeze-thaw cycles. |
| **Shipping** | In general, recombinant proteins are provided as lyophilized powder which are shipped at ambient temperature.<br>Bulk packages of recombinant proteins are provided as frozen liquid. They are shipped out with blue ice unless customers require otherwise. |

## Description

| | |
|---|---|
| **Description** | Recombinant human Coiled-coil domain-containing protein 90B (CCDC90B) fragment (amino acids 59-230), a stable and soluble mitochondrial membrane protein unit ideal for structural and biochemical studies.<br>Coiled-coil domain-containing protein 90B (CCDC90B) is a mitochondrial membrane protein localized to the mitochondrion and characterized as a single-pass membrane protein. While detailed functional data is limited, its mitochondrial localization suggests potential roles in mitochondrial structure, dynamics, or associated cellular processes. The provided fragment (59-230) was computationally selected to ensure stability and solubility, enabling reliable investigation of this protein region in research applications. |
