# Recombinant CC107 protein (His tag)

| | |
|---|---|
| **Catalog Number** | 549041 |
| **Species** | Human |
| **Expression System** | E. coli |
| **Accession** | Q8WV48 |
| **Molecular Weight** | Predictes a molecular mass of 10.55 kDa. In SDS-PAGE under reducing conditions, it migrates as an approximately 11 kDa band. |

## Product Information

| | |
|---|---|
| **Sequence Region** | 86-163 |
| **Form** | Lyophilized powder |
| **Formulation** | Lyophilized from sterile PBS, pH 7.4 |
| **Purity** | >87%, by SDS-PAGE with Coomassie Brilliant Blue staining. |
| **Endotoxin** | Not tested. |
| **Activity** | Not tested. |
| **Stability** | Samples are stable for up to twelve months from date of receipt at -70℃ |
| **Protein Construction** | DNA encoding 86-163 aa (Q8WV48) were fused with 6His tag. |

## Storage & Handling

| | |
|---|---|
| **Reconstitution** | Reconstitute at 0.25 μg/μl in sterile water for short-term storage. Reconstitution with 50% glycerol solution is recommended for longer term storage (see Stability and Storage for more details). If a different concentration is needed for your purposes please adjust the reconstitution volume as required (please note: the ion concentration of the final solution will vary according to the volume used). Note: Centrifuge vial before opening. When reconstituting, gently pipet and wash down the sides of the vial to ensure full recovery of the protein into solution. |
| **Storage** | Store it under sterile conditions at -20℃ to -80℃. It is recommended that the protein be aliquoted for optimal storage. Avoid repeated freeze-thaw cycles. |
| **Shipping** | In general, recombinant proteins are provided as lyophilized powder which are shipped at ambient temperature.<br>Bulk packages of recombinant proteins are provided as frozen liquid. They are shipped out with blue ice unless customers require otherwise. |

## Description

| | |
|---|---|
| **Description** | Recombinant Human Coiled-coil domain-containing protein 107 (CCDC107) fragment (residues 86-163) is a stable and soluble protein unit designed for structural and biochemical studies. This 78-amino acid fragment was computationally optimized to facilitate research into the unique membrane-associated properties of CCDC107.<br>The full-length Coiled-coil domain-containing protein 107 (CCDC107) is encoded by the CCDC107 gene in Homo sapiens. According to UniProt entry Q8WV48, CCDC107 is localized to the membrane and is characterized as a single-pass membrane protein. While specific functional details remain to be fully elucidated, its membrane association and structural features suggest potential roles in cellular organization and membrane-related processes, making it an important target for further investigation in cell biology and molecular research. |
