# Recombinant COMD7 protein (His tag)

| | |
|---|---|
| **Catalog Number** | 543053 |
| **Species** | Human |
| **Expression System** | E. coli |
| **Accession** | Q86VX2 |
| **Molecular Weight** | Predictes a molecular mass of 24.20 kDa. In SDS-PAGE under reducing conditions, it migrates as an approximately 24 kDa band. |

## Product Information

| | |
|---|---|
| **Sequence Region** | 1-200 |
| **Form** | Lyophilized powder |
| **Formulation** | Lyophilized from sterile PBS, pH 7.4 |
| **Purity** | >86%, by SDS-PAGE with Coomassie Brilliant Blue staining. |
| **Endotoxin** | Not tested. |
| **Activity** | Not tested. |
| **Stability** | Samples are stable for up to twelve months from date of receipt at -70℃ |
| **Protein Construction** | DNA encoding 1-200 aa (Q86VX2) were fused with 6His tag. |

## Storage & Handling

| | |
|---|---|
| **Reconstitution** | Reconstitute at 0.25 μg/μl in sterile water for short-term storage. Reconstitution with 50% glycerol solution is recommended for longer term storage (see Stability and Storage for more details). If a different concentration is needed for your purposes please adjust the reconstitution volume as required (please note: the ion concentration of the final solution will vary according to the volume used). Note: Centrifuge vial before opening. When reconstituting, gently pipet and wash down the sides of the vial to ensure full recovery of the protein into solution. |
| **Storage** | Store it under sterile conditions at -20℃ to -80℃. It is recommended that the protein be aliquoted for optimal storage. Avoid repeated freeze-thaw cycles. |
| **Shipping** | In general, recombinant proteins are provided as lyophilized powder which are shipped at ambient temperature.<br>Bulk packages of recombinant proteins are provided as frozen liquid. They are shipped out with blue ice unless customers require otherwise. |

## Description

| | |
|---|---|
| **Description** | Recombinant Human COMMD7 (COMM domain-containing protein 7) fragment (amino acids 1-200) is a high-purity protein designed for investigating the role of the COMM domain in endosomal recycling and NF-kappa-B regulation. This fragment fully encompasses the functional COMM domain, making it an ideal tool for domain-specific functional studies.<br>COMM domain-containing protein 7 (COMMD7) is a scaffold protein essential for the commander complex, which plays a critical role in endosomal recycling of transmembrane cargos. The protein also modulates cullin-RING E3 ubiquitin ligase (CRL) complexes and associates with the NF-kappa-B complex to suppress its transcriptional activity. Located in cytoplasmic vesicles, COMMD7 is involved in key cellular processes including protein trafficking and inflammatory signaling pathways. |
