Recombinant CC196 protein (His tag)

Catalog Number	551453
Synonyms	Long intergenic non-protein coding RNA 238
Species	Human
Expression System	E. coli
Accession	A0A1B0GTZ2
Molecular Weight	Predictes a molecular mass of 15.55 kDa. In SDS-PAGE under reducing conditions, it migrates as an approximately 17 kDa band.

Product Information

Sequence Region	1-118
Form	Lyophilized powder
Formulation	Lyophilized from sterile PBS, pH 7.4
Purity	>87%, by SDS-PAGE with Coomassie Brilliant Blue staining.
Endotoxin	Not tested.
Activity	Not tested.
Stability	Samples are stable for up to twelve months from date of receipt at -70℃
Protein Construction	DNA encoding 1-118 aa (A0A1B0GTZ2) were fused with 6His tag.

Storage & Handling

Reconstitution	Reconstitute at 0.25 μg/μl in sterile water for short-term storage. Reconstitution with 50% glycerol solution is recommended for longer term storage (see Stability and Storage for more details). If a different concentration is needed for your purposes please adjust the reconstitution volume as required (please note: the ion concentration of the final solution will vary according to the volume used). Note: Centrifuge vial before opening. When reconstituting, gently pipet and wash down the sides of the vial to ensure full recovery of the protein into solution.
Storage	Store it under sterile conditions at -20℃ to -80℃. It is recommended that the protein be aliquoted for optimal storage. Avoid repeated freeze-thaw cycles.
Shipping	In general, recombinant proteins are provided as lyophilized powder which are shipped at ambient temperature. Bulk packages of recombinant proteins are provided as frozen liquid. They are shipped out with blue ice unless customers require otherwise.

Description

Description	This product is a high-quality recombinant protein fragment of human Coiled-coil domain-containing protein 196 (CCDC196), also known as Long intergenic non-protein coding RNA 238. The fragment, encompassing residues 1-118, was computationally designed for optimal stability and solubility, making it an ideal reagent for structural biology and biochemical characterization studies. Coiled-coil domain-containing protein 196 (CCDC196) is a human protein encoded by the gene CCDC196. The specific molecular function and subcellular localization of the full-length protein are areas of active research. This recombinant fragment provides researchers with a defined, soluble protein unit to facilitate experimental investigation into the properties and potential roles of CCDC196 in cellular processes.
